

Perfect Fan-Binder Type: HHS 11

The PRÄCOLL is a semi-automatic adhesive-binding system for the fan-binding of assortment and series of books.

Different block sizes do not require any adjustment on the machine. The PRÄCOLL is therefore extremely suitable for binding assortment books with a high output.

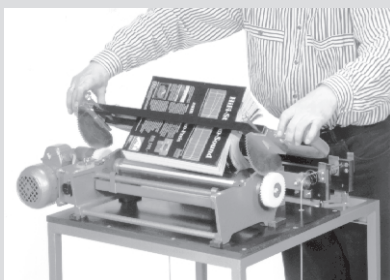

How does the PRÄCOLL work?

The books are inserted into the pressing device with their back facing downwards to ensure that all pages are in a correct position for glueing. The guide cog-wheel ensures that glue is applied evenly.

After the glueing process, the clamp stops the end paper from slipping.

The book block should be left in the clamp during the drying process, as it stops moisture from seeping too deeply into the paper which could cause waves in the back, espe-

cially when art paper is used. Moreover, the clamp helps to form a thicker joint to facilitate the rounding of the book.

PRÄCOLL Type: HHS 11

TECHNICAL DATA

Space required	75 x 62 cm
Height	140 cm
Weight	approx. 60 kg
Power	230 volts single-phase – 0,2 kW
Output	approx. 60 books/hour

For book blocks of the following sizes

Minimum width	110 mm
Maximum height	345 mm
Maximum thickness	82 mm

(PRÄCOLL for other book sizes on request)

Subject to technical alteration

For the drying process, we recommend our infra-red heated drying device PRÄDRY .

When art paper is being used, our PRÄCUT machine which cuts and scores book blocks simultaneously prior to fan-binding, has proved to provide a far better durability of the fan-binding.

The PRÄCOLL is available in two versions:

■ **Model HHS 11 G**

for glueing flat book blocks, brochures etc. A jogging device is fitted to this model.

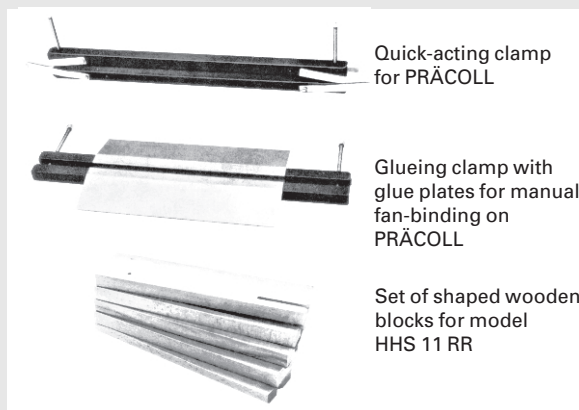

■ **Model HHS 11 RR**

for glueing both flat and round back books. Without jogging device, but with shaped wooden blocks which can be inserted into the machine.

Both models are equipped with a glueing machine of 35 cm width which can be used separately as a normal surface glueing machine.

Accessories:

- Quick-acting clamp for PRÄCOLL
- Glueing clamp with glue plates for manual fan-binding on PRÄCOLL
- Set of shaped wooden blocks for model HHS 11 RR

FAN-BINDER FOR MANUAL GLUEING

For manual fan-binding the PRÄCOLL is also available with basic equipment as shown on photograph below.

Compared to the standard version, it does not include the swivel arm, the glue pot with stand and the glueing machine. One quick-acting clamp is equipped with glue-plates.

Just like standard machine this version is available either as model „G“ or „RR“.
