

Mod. REGENT 500

This machine is suitable for all laminating operations. It allows to press, smooth and laminate sheets of paper, cardboard or similar materials which are glued and removes the wrinkles and air bubbles.

Simply feed the glued combination into the Rotary Pressing Machine. Upper rubber roller and lower metal roller can be easily adjusted to accommodate combinations up to 25 mm thick. The pressure can be adjusted independently of the material thickness.

Easy to use, and virtually maintenance-free. The rollers and gears are completely guarded.

**Motor :** Motor for 230 volts AC 50 cy 1 ph, other currents/voltages on request.  
Variable speed control.
